

# Exporting Trimble Data to Google Earth KML/KMZ

Note: KML export only available in Trimble GPS Pathfinder Office v4.20 and newer.

In Pathfinder Office click Utilities > EXPORT > Sample KML Setup:

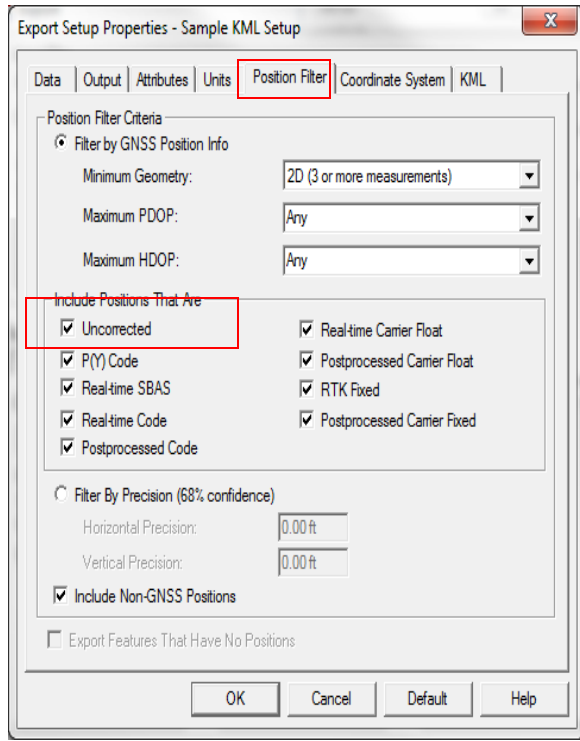

Next click Properties

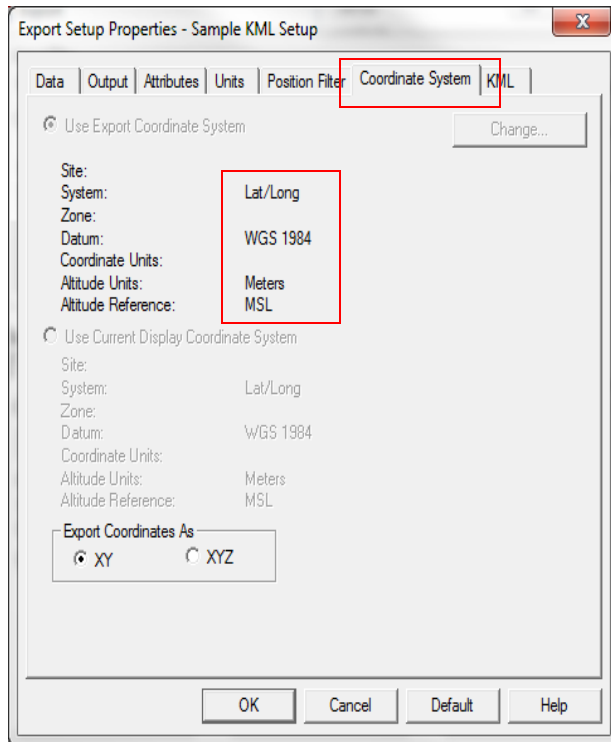

There are only a few default settings you need to check:

Position filter tab: (Check the “Uncorrected Box”)

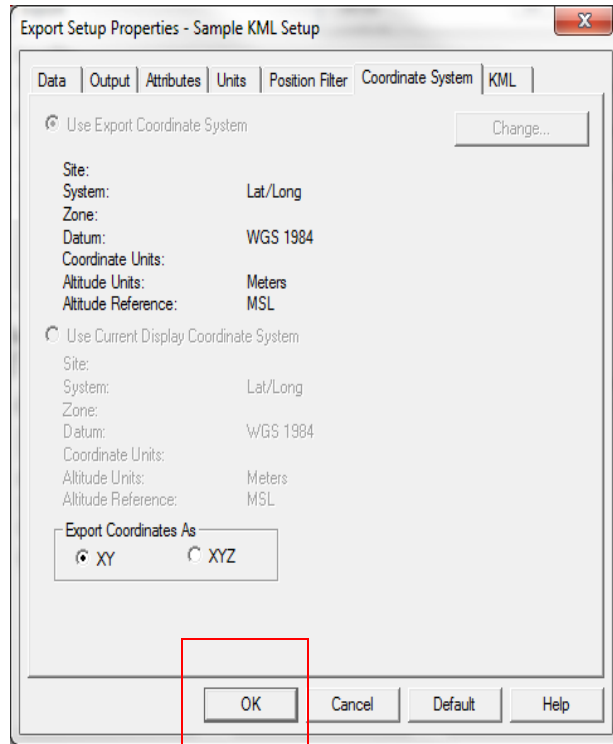

Coordinate System Tab (don't change it from the default Lat/Long WGS 1984 Coordinate System)

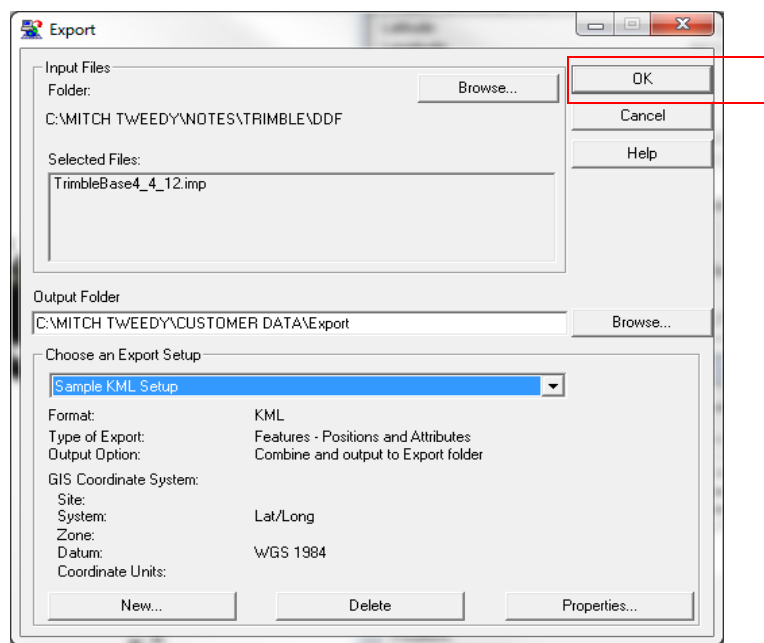

The other export settings should not affect the ability to export KML/KMZ, so it is optional to change them or leave them at the default.

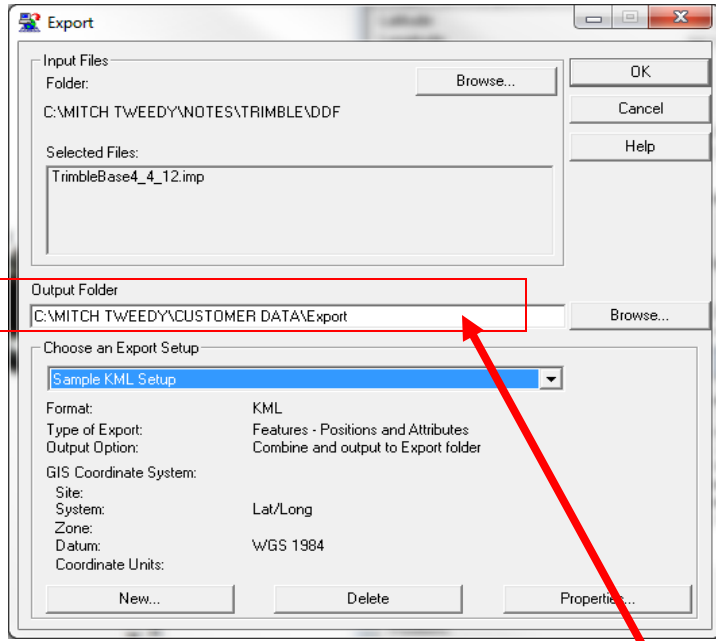

Click “OK” to save your preferences

Click “OK” to export your data to KML/KMZ format

Take note of where Trimble GPS Pathfinder Office will output your KML/KMZ

**MINIMIZE OR CLOSE TRIMBLE GPS PATHFINDER OFFICE**

Simply browse to the KML/KMZ, and double click on it to open:
